**from 145,06 EUR**

Item no.: 401307

shipping weight: 0.10 kg

Manufacturer: Snom Technology GmbH

## Product Description

Thanks to its timeless design and the two modern colour variations, the new Snom D735 not only impresses on the outside, but is also technically state of the art. The high-resolution 2.7 inch (6.9 cm) colour display is framed by 8 self-labelling, multi-coloured function keys. The Snom D735 is the first VoIP phone in the world to have a built-in proximity sensor to ensure that the user is always shown all important information: as soon as the user's hand approaches the display or the function keys, the display switches automatically and shows all relevant information about the key assignment. If the hand moves away again, the display switches back to normal display mode. The smart sensor greatly expands the functionality of the D735 and supports the user in daily business operations. Highlights- High-resolution 2.7 inch (6.9 cm) TFT display- 32 self-labelling function keys (8 physical)- Sensor-supported user interface- Speakerphone with wideband audio- Improved audio quality thanks to Digital Signal Processor (DSP)- 2-port Gigabit Ethernet switch (RJ45)- Power over Ethernet IEEE 802.3af, Class 2- USB headset-capable- D7 expansion module-capable- Connection option for USB WiFi stick- Connection option for cordless headsets via Electronic Hook Switch (EHS) Scope of delivery- snom D735 black Customised, stand, handset with handset cable, Ethernet cable, quick start guide Note text Scope of delivery- Power is supplied via PoE or power supply unit.
