Item no.: 395503

Large Waterproof IP67 Enclosure with Cable Gland

from **32,40 EUR**

Item no.: 395503
shipping weight: 3.00 kg
Manufacturer: ITELITE

📄 Product Description

The SRA enclosure is the largest enclosure made out of polystyrene by injection molding. Its dimensions are 386x386 mm; the usable height in the center of the casing is about 70 mm. The material is protected against UV rays. Housings of this type are in a standard adapted for Mikrotik routers. With the right order quantity we can provide a housing adapted for any PCB. SRA housing has an opening of 23.2/25 mm suited for a waterproof cable gland and/or waterproof RJ45 ethernet connector. It is also possible to provide this enclosure with two holes for the RJ-45 glands, as well as connectors/pigtails mounted on the bottom of the case. Along with the enclosure, the customer can optionally choose a set of accompanying components such as: mast mounting, wall mounting, mounting with tilt option, fixing without tilting down, individual color for the case, pigtails, grounding cable, external omnidirectional antennas, external connectors, led lights, etc. The whole set is made out of the highest quality materials and is intended for use even in the most demanding weather conditions.
